INTERIOR DESIGN ONE-YEAR VOCATIONAL PROGRAM

The One-Year Vocational Program in Interior Design is a comprehensive and immersive educational experience designed to empower students with the knowledge and skills required to excel in the world of interior design. Throughout the program, students learn about the principles of design, spatial planning, color theory, and materials selection. They engage in hands-on projects and exercises that allow them to apply these principles to real-world interior design challenges, honing their ability to create functional, aesthetically pleasing spaces that meet the needs and preferences of clients. In addition to mastering the art of design, students also gain valuable expertise in project management, a crucial aspect of bringing interior design visions to life successfully.

LEVEL 1: INTERIOR SPACE PLANNING

This level will introduce students to the fundamentals of interior architectural design and space planning, and the basic tools for representation and expression.

LEVEL 2: INTERIOR DESIGN PROCESS

In this level, students will implement the design processes and methodological approach, applying and interpreting a complete interior design proposal that responds to a given brief.

LEVEL 3: CONTEMPORARY DESIGN SYNERGY UNIT

In this level, students will extend their knowledge of interior design project development. The fundamental role of research and analysis in the formulation of project ideas and direction will be emphasized. The acquisition of investigative and representational tools will support this process.

LEVEL 4: INTERIOR DESIGN REDEFINED

In this level, the students will connect the design components of the interior project with user-centered experience. The architectural interpretation of a sensorial design intention will be examined through the coordinated use of materials, lighting, and color in different architectural spaces.
